

FEEDING SYSTEM FOR FARROWING SOWS

## Fetura CLOUD

Smart system  
for farm management

NUTRI ONE

**POLISH  
PRODUCT**

# NUTRI ONE

stands for automatic and well-optimized feeding and relieving the workload of farm employees.

## Feeding - Up to 6 Times

Nutri One delivers feed to sows up to six times a day, ensuring regular and consistent nutrition, vital for the well-being of lactating sows.

## Improved Sow performance

- Healthier Sows and Stronger Piglets
- Boosts sow health and milk production.
- Spurs rapid piglet growth – up to 950g in 4 weeks than traditional feeding.
- Lowers piglet mortality for a stronger litter.

## LED Indicator

A pioneering feature, the LED indicator on Nutri One, provides instant visual feedback on feed consumption, enabling precise monitoring and adjustments.

## Seamless Integration

Fits into Your Existing Barn Setup - Nutri One's design allows for easy installation in existing barns, making it a hassle-free addition to your hog production facility.

In the demanding world of hog production, the Nutri One stands as a game-changer in nurturing lactating sows. Designed for excellence, this automated feeder ensures that each sow receives optimal nutrition, tailored to its unique needs.

We create innovations!

### How it works?

Nutri One simplifies and enhances the feeding process with its automated design. Sows self-administer their feed doses using an intuitive trigger mechanism, aligned with a daily feeding curve. The LED indicator on the device shows the amount of feed consumed, while the Fetura CLOUD app provides comprehensive reports and management tools.
