PRODUCT

SILOMASS

effortlessly monitor your feed inventory, receive usage predictions, and get instant low-level alerts for stress-free feed management

We create innovations!

Real-Time Weight Measurement

Our system provides you with real-time information about the exact amount of feed inside your bin or silo. Say goodbye to uncertainty and hello to precision.

Predictive Analysis

The feed consumption ratio determines how effectively animals convert feed into weight. An optimized ratio ensures that gilts and finishers are growing at their best possible rate.

Low-Level Alerts

Receive instant notifications when your feed reaches a minimum level, allowing you to take timely action and avoid disruptions in your operations.

Cloud-Based Visualization

Anomalies in feed consumption can be an early indicator of health issues. Regular monitoring can help in early detection, ensuring timely intervention.

DISPLAY
UP to 8 Bin to One

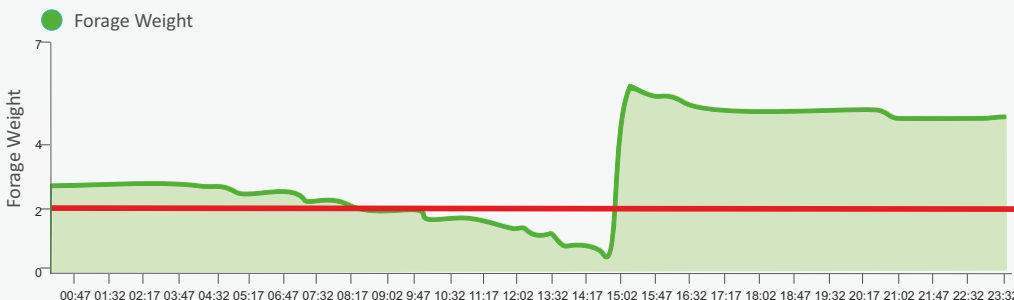

LOAD CELL

Are you tired of the guesswork when it comes to managing the feed in your bin or silo? Do you wish there was an easier way to keep track of your inventory and ensure you never run out of feed unexpectedly? Look no further! Our cutting-edge Silo Mass System is here to revolutionize the way you manage your feed inventory.

Building 1

3,52t

Volume: 15.00t

How it works?

Each bin is set up with load cells under each leg, all connected to a central display unit. Our AI predicts the number of days your feed will last based on pig consumption, and it sends alerts when the feed reaches the minimum level.
